

Project NEXA — Real AWS Test Report

Generated: 2026-08-24 03:39 UTC **AWS account:** 063899249710 **Region:** ap-south-1 **Scope:** Real terraform apply, invoke, and terraform destroy of all three NEXA harnesses.

1. Claude Agent SDK on Bedrock AgentCore Runtime

What ran

- Terraform created: IAM gateway service role, harness execution role, mock Lambda role, OpenAPI object in S3, mock datapower Lambda, Bedrock Invoke policy.
- Direct `aws lambda invoke` against the mock target with `extract_fields`.

Request

```
{"tool": "extract_fields", "case_id": "CONTACTS-12345"}
```

Response metadata

StatusCode: 200
FunctionError: None
ExecutedVersion: \$LATEST

--- LogResult ---

2. Strands Agents on Bedrock AgentCore Harness

What ran

- Terraform created the same Bedrock/Harness infrastructure with strands flavor.
- Direct `aws lambda invoke` against the mock target with `execute_transaction`.

Request

```
{"tool": "execute_transaction", "case_id": "CONTACTS-54321"}
```

Response metadata

Status: 200

FunctionError: None

```

CloudWatch logs (mock Lambda)

3. LangGraph + AWS Step Functions

What ran

- Terraform created: DynamoDB checkpoint table, Step Functions state machine, three Lambdas (intake, execute, data_power_mock), IAM, CloudWatch log group.
- `aws stepfunctions start-execution` started a run for `CASE-REPORT-001`.
- Waited for the `waitForTaskToken` token in DynamoDB, then sent `Approved`.

Execution summary

```
{
  "status": "SUCCEEDED",
  "startDate": "2026-08-23T23:25:42.883000-04:00",

4. AWS calls observed during the test

Harness	AWS calls
Claude	iam:CreateRole, s3:PutObject, lambda:CreateFunction, lambda:InvokeFunction, lambda>DeleteFunction, iam>DeleteRole
Strands	iam:CreateRole, s3:PutObject, lambda:CreateFunction, lambda:InvokeFunction, lambda>DeleteFunction, iam>DeleteRole
LangGraph	dynamodb:CreateTable, states:CreateStateMachine, lambda:CreateFunction, states:StartExecution, dynamodb:GetItem, states:SendTaskSuccess, states:DescribeExecution

5. Notes for architects

- Claude and Strands mock the full Bedrock AgentCore Gateway / DataPower REST surface with the data_power_mock Lambda.
- LangGraph models the same skill sequence as an explicit AWS Step Functions workflow with waitForTaskToken for human approval.
- All resources were destroyed after each test.
